This document outlines how to obtain the csv ('prove-ai_metadata_currentyear_currentmonth_currentday.csv') and images folder (ISIC-images.zip) needed for this project

**Note that these instructions are meant to be followed after you have cloned the project's Github repository onto your local machine.

To obtain 'prove-ai_metadata_currentyear_currentmonth_currentday.csv'

1. Go to https://api.isic-archive.com/collections/218/
2. Click on 'Actions'
3. Select 'Download Metadata'
4. Open the cloned repository for this project
5. Move the csv file into the data folder

To obtain 'ISIC-images.zip'

1. Go to https://api.isic-archive.com/collections/218/
2. Click on 'Actions'
3. Select 'Download Collection'
4. Open Downloads and unzip the folder
5. Open the cloned repository for this project
6. Move the ISIC-images folder into the data folder

You should now be able to run the scripts folder
